

DECISION-MAKING

Make sound **DECISIONS TO MITIGATE THE EFFECTS** of a VUCA environment

How does a business navigate a world that demonstrates global examples of volatility, uncertainty, complexity, and ambiguity (VUCA) in both general conditions and situations? How well are you prepared for the challenges of tomorrow? How do you maintain commercial advantage, exploit opportunities, and lessen risk?

At the heart of the solution is solid decision-making. It's a concrete skill that can't be taken for granted. In a perfect world, decision-making would be linear, whereby information is gathered, options are weighed, and choices are made. However, we don't operate in a well-defined environment, and information and situations don't remain static.

"To succeed in a VUCA world, we must expend energy in the areas that produce the highest payoff for our organizations."

– General George Casey

Former Army Chief of Staff and Commanding General of the Multinational Force in Iraq

This workshop will provide your employees the ability to:

- Understand today's decision-making environment in the context of economic, geo-political, and social events
- Plan for imminent challenges with a strategic viewpoint to maintain a commercial advantage
- Apply the necessary skills to view problems from an adversarial perspective and push the boundaries of standard decision-making
- Identify and plan for potential risks in a variety of categories
- Balance the competing needs of business, customers, and employees in uncertain times

The process of effective decision-making is both powerful and daunting, especially in a VUCA environment. However, with this immersive workshop, your team will not only learn how to identify the risks, but also acquire the crucial tools to overcome them.

DECISION-MAKING

Workshop Highlights

Provides an understanding of the VUCA world and its implications for leaders and decision makers

Delivers relevant case studies of organizations and leaders who have faced significant turbulence

Offers a range of problem-solving tools aimed to meet current and future demands

Presents a hands-on opportunity to design relevant and practical execution frameworks

Explores Red Teaming models designed to test organizational decision-making

"Whenever you see a successful business, someone once made a courageous decision."

– Peter Drucker

Consultant, Educator, Author, Inventor of *Management by Objectives*
